

COMBINED ELECTRIC / MECHANICAL CONTROLS FOR PETROL MOTORSTOP, ENGAGED CLUTCH WITH ELECTRIC CABLE OUTSIDE THE TUBE AND ORDER FORM MODEL CL 7B

Characteristics:

Control functioning: the lower lever B can be activated only after having activated the upper lever A (see note).

The upper lever A is kept activated (lowered) if the lower lever B is in locking position

Application example: deadman device (engine switching off - lever A) combined with clutch lever control (lever B)

Upper lever A electric contact: normally open microswitch (see note)

Upper lever A material and colour: red nylon; holder in black nylon

Assembly: on tubes Lever A fastening type: expansion bush inside the tube

Tube inner diameter for lever A (mm): from 18 to 26,5

Lower lever B linear stroke in locking position (mm): 13,5

Lower lever B material and treatment: chromium plated metal; holder in black nylon

Assembly: on tubes Lever B fastening type: nylon collar

Tube outer diameter for lever B (mm): 22 - 25 - 26 - 27 - 28 mm

To order: compose, please, your product code inserting the boldfaced code corresponding to the chosen option in the proper square.

CL 7B

Tube inner Ø from mm 18 to mm 21,5: **1**

Tube inner Ø from mm 21,6 to mm 26,5: **2**

Tube outer Ø mm 22: **3**

Tube outer Ø mm 25: **4**

Tube outer Ø mm 26: **5**

Tube outer Ø mm 27: **6**

Tube outer Ø mm 28: **7**

Note: A device inside the lower lever allows its functioning only after having lowered the upper lever, avoiding an accidental operation of the lower lever.

Microswitch: "normally open" for internal combustion engine, "normally closed" for electric engine. The characteristic of the microswitch "normally open" or "normally closed" is meant with the lever leant on the knob (lowered lever). **Knob:** shaped for assembly on tubes supplied in support of.

COMBINED ELECTRIC / MECHANICAL CONTROLS COMPATIBLE WITH UPPER LEVER ELECTRIC CABLES MODEL CL 7B

Characteristics of compatible electric cables for lever "A":

Cable outer diameter: $\varnothing 5,5$ mm
 Cable length: upon request
 Wires diameter: $\varnothing 2 \times 0,75$ mm
 Wires stripping length: upon request
 Wires terminals: see table

COMBINED ELECTRIC / MECHANICAL CONTROLS ORDER FORM FOR COMPATIBLE WITH UPPER LEVER ELECTRIC CABLES MODEL CL 7B

To order:

The technical options that are represented on the opposite page are the standard personalizations which are provided from the company.

Among these possibilities, you can choose the cable construction that meets your requirements.

At first choose if you want the covered wires cut at sheath's edge or the covered out of sheath wires and eventually select the corresponding terminals among the possible options.

Find out your preferences and fill in the boxes with the number or the letters/number corresponding to your options.

Example: if you choose the covered out of sheath wires and you want a loop on the blue wire as terminal, indicate the code 12 or 13 or 14, according to your needs.

And so on for other variables.

The same procedure must be used for the brown wire and then select the corresponding options.

To order: compose, please, your product code inserting the boldfaced code corresponding to the chosen option in the proper square.

CL 7B - Lever A cable	Cut cables at sheath's edge (T)		Blue covered cable

COMBINED ELECTRIC / MECHANICAL CONTROLS COMPATIBLE WITH LOWER LEVER CABLES MODEL CL 7B

Characteristics of compatible cables for lever "B":

- Sheath diameter: Ø6 mm or Ø7 mm with inner antifriction tube
- Sheath length: upon request
- Wire diameter: Ø1,9 mm or Ø2,5 mm
- Wire protrusion length: upon request
- Sheath terminals: see table
- Wire terminals: see table

COMBINED ELECTRIC / MECHANICAL CONTROLS ORDER FORM FOR COMPATIBLE WITH LOWER LEVER CABLES MODEL CL 7B

To order:

The technical options that are represented on the opposite page are the standard personalizations which are provided from the company.

Among these possibilities, you can choose the cable construction that meets your requirements.

At first choose the sheath diameter and select the corresponding terminals among the possible options.

Find out your preferences and fill in the boxes with the number or the letters/number corresponding to your options.

Example: if you choose a Ø7 mm sheath and you want a sleeve with nib as terminal, indicate the code 05 or 06, according to your needs.

And so on for other variables.

The same procedure must be used to choose the wire: start choosing the diameter and then select the corresponding options.

To order: compose, please, your product code inserting the boldfaced code corresponding to the chosen option in the proper square.
